

The New Breed of Investment Funds 100% Capital Protection

Many people are now concerned that the stock market is too high and are predicting a fall in the coming months. Products with capital guarantees have become increasingly popular over recent years but there is normally a catch. This is typically in the form of reducing the upside of any potential future growth or only offering capital protection in the region of 70 – 90%.

New products have now become available though the IFA sector that buck this trend. One of the best products currently offers:

- 100% Capital Protection
- 100% of all future growth
- Option to increase the guarantee as the fund value increases
- Large selection of investment funds
- Competitive Fund Management Charges
- Available for Pension and Investment Contracts
- Provided by a leading Investment provider

If you are concerned about the potential volatility of your pension and/or investment funds then this could be of interest to you. For further information please enquire via our enquiry pages.
